

## Ejercicio 8

a)

```
1 void multiplicar(vector<int> s)
2 {
3     int i = s.size() / 2;
4
5     while (i < s.size())
6     {
7         s[s.size() - i] = 10 * s[s.size() - i];
8         s[i] = 10 * s[i];
9         i++;
10    }
11 }
```
